LO4 S1 - FIELD STUDY
JULY - DECEMBER 2026 SESSION

COURSE	: DFD 40143 – MOBILE APPLICATION DEVELOPMENT
DATE	: JULY 2026
DURATION	: 1 WEEKS
PROGRAMME	: DFD

Instructions :

1. This field study is an individual task.
2. Meet all requirements.

This question booklet contains 2 printed pages

Scenario Project:

This field study enables students to apply the knowledge and skills learned in Mobile Applications Development. Students are required to conduct a case study on an existing mobile application and perform a user requirement survey as a preparation for developing a new mobile application. The findings must be presented in a video presentation.

Task A: Mobile Application Selection

Choose **ONE (1)** category of mobile application from the list below:

- i. Business Apps
- ii. Gaming Apps
- iii. Entertainment Apps
- iv. Lifestyle Apps
- v. Educational Apps
- vi. Utility Apps
- vii. Travel Apps

Then, select **ONE (1) existing mobile application** from the chosen category as your case study.

Example:

- i. Business App → Shopee
- ii. Gaming App → Mobile Legends: Bang Bang
- iii. Entertainment App → Netflix
- iv. Lifestyle App → MyFitnessPal
- v. Educational App → Duolingo
- vi. Utility App → Google Drive
- vii. Travel App → Airbnb

Task B: User Requirement Survey

Students are required to conduct a survey using **Google Forms** to collect user requirements for the mobile application that they intend to develop.

Survey Requirements

- Create a Google Form.
- Collect **at least 70 responses**.
- The questionnaire must contain:
 - **Section A: Respondent Information**
 - User country of origin
 - Age
 - Gender
 - Occupation
 - App topic of interest
 - App intent (purpose of using the app)
 - **Section B: Survey Questions**
 - Prepare **10 survey questions** related to the proposed mobile application.
 - The 10 questions **do not include** the respondent information listed in Section A.
- Present the survey findings using charts or graphs generated from Google Forms.

Task C: Video Presentation Report

Prepare a video presentation that consists of the following five (5) parts.

Part 1: Introduction

- Introduction to the selected mobile application category.
- Background of the chosen mobile application.
- Objectives of the case study.

Part 2: Mobile Application Review

Review the selected mobile application by discussing:

- Main features
- User Interface (UI)
- User Experience (UX)
- Strengths
- Weaknesses
- Target users

Part 3: User Requirement Survey Findings

Present the survey results obtained from Google Forms.

Include:

- Respondent demographics
 - Country of origin
 - Age
 - Gender
 - Occupation
- Graphs and charts for each survey question.
- Analysis of users' opinions and expectations.
- Summary of the survey findings.

Minimum responses: 70 respondents

Part 4: Proposed Mobile Application

Based on the survey findings, explain the mobile application that you plan to develop.

Include:

- App name
- Problem statement
- Objectives
- Target users
- Main features
- Expected benefits

Part 5: Conclusion

Summarise:

- Case study findings.
- Survey findings.
- Proposed mobile application.
- Overall learning experience.

Task D: Video Presentation Evaluation

The video presentation will be evaluated based on the following criteria:

- i. Clarity of ideas
- ii. Conviction of ideas
- iii. Effectiveness and articulation of ideas
- iv. Understanding of the topic and ability to answer questions
- v. Suitability of the presentation for the target audience
- vi. Body language, presentation skills, and visual clarity
- vii. Systematic organisation of content
- viii. Effective use of technology

Submission

Students must submit:

1. Google Forms survey link.
2. Survey responses (**minimum 70 respondents**).
3. Survey summary with graphs/charts.
4. Video presentation.
5. Presentation (Video).
